

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) An automated method of authorizing a consumer purchase comprising the steps of:

receiving a plurality of first deposit transactions depositing funds within a first account;

determining a first credit limit associated with a loan amount with for the first account wherein the first credit limit is based upon transaction information including the plurality of deposits ~~account information associated with~~ into the first account;

receiving a request for authorization of a purchase transaction associated with the first account; and

authorizing the purchase transaction if funds within the first account plus the first credit limit are ~~[[to]]~~ sufficient to facilitate the purchase transaction;

~~determining a loan amount in response to an amount of the first credit limit utilized for said step of authorizing;~~

~~granting a loan in response to the loan amount;~~

~~receiving a subsequent deposit transaction having additional funds associated with the first account;~~

~~applying a loan repayment portion of the additional funds to at least partial repayment of the loan and transferring a remaining portion of the additional funds to the first account; and~~

~~generating credit information indicative of the loan granting and loan repayment.~~

2. (Currently Amended) The method of claim 1, wherein the ~~account~~ transaction information consists ~~substantially only of one or more of the following:~~

deposit transaction information in the first account, and
purchase transaction information in the first account,
any loan granting and repayment information, and
any provided personal information indicative of a person associated with the first
account
but does not include other financial information related to the person.

3. (Currently Amended) The method of claim 1 wherein the ~~account~~ transaction information consists ~~substantially~~ only of

deposit transaction information in the first account and
personal information indicative of identifying a name of a person associated with
the first account
but does not include other financial information related to the person.

4. (Currently Amended) The method of claim 1 wherein the ~~account~~ transaction information consists ~~substantially~~ only of

deposit transaction information in the first account,
purchase transaction information in the first account, and
any loan granting and repayment information in the first account.

5. (Currently Amended) The method according to claim 1, further comprising:

receiving a subsequent deposit transaction having additional funds associated
with the first account;

applying a loan repayment portion of the additional funds to at least partial
repayment of the loan and transferring a remaining portion of the additional funds to the
first account; and

wherein the transaction information includes loan granting and loan repayment
information

~~wherein the loan repayment portion of the additional funds is a predetermined amount.~~

6. (Currently Amended) The method according to claim ~~[[1]]~~5, wherein the loan repayment portion of the additional funds is an amount greater than a predetermined minimum amount wherein the loan repayment ~~portion~~portion is indicated ~~specified~~ by a unnamed person associated with the first account.

7. (Currently Amended) The method according to claim 1 further comprising the steps of:

determining a second credit limit amount associated with a second account ~~substantially-independent~~ of the first account in response to the ~~[[credit]]~~transaction information;

receiving a request for authorization of a second purchase transaction associated with the second account; and

authorizing the second purchase transaction if the second credit limit amount is sufficient to facilitate the second purchase transaction.

8. (Currently Amended) The method according to claim 1 wherein the preceding steps are performed by a first financial institution and the subsequent steps are performed by a second financial institution ~~substantially-independent~~ of the first financial institution, the method at the second financial institution comprising the steps of:

determining a second credit limit amount associated with a second account ~~substantially-independent~~ of the first account in response to the ~~[[credit]]~~transaction information received from the first financial institution;

receiving a request for authorization of a second purchase transaction associated with the second account; and

authorizing the second purchase transaction if the second credit limit amount is sufficient to facilitate the second purchase transaction.

9. (Currently Amended) The method according to claim 1, further comprising the steps of:

receiving a plurality of deposit transactions depositing funds into the first account;
authorizing each of a plurality of purchase transactions if funds within the first account are sufficient to facilitate each of the plurality of purchase ~~transactions~~transactions; and

including the plurality of deposit transactions and purchase transactions in the ~~account~~ transaction information; wherein

said step of determining the first credit limit determines the first credit limit to be ~~substantially-zero~~ upon reception of ~~[[the]]~~ a first deposit transaction and increases the limit in response to subsequent deposits~~the account information of said step of including receiving subsequent~~.

10. (Currently Amended) The method according to claim 9, wherein at least a portion of the transactions of said steps of receiving the plurality of deposit transactions and authorizing the plurality of purchase transactions are from an unnamed source~~anonymous~~, without identification of a person associated with the first account, and the method further comprises the step of:

receiving personal information identifying the person associated with the first account wherein

said step of determining the first credit limit includes ~~account~~ transaction information from the plurality of unnamed ~~anonymous~~ deposit and purchase transactions in the determination of the first credit limit.

11. (Currently Amended) The method according to claim 10 wherein the unnamed ~~anonymous~~ deposit transactions include cash deposits received at an automated currency processor using a card having information identifying the first account but not the person, and the unnamed ~~anonymous~~ purchase transactions are facilitated by the card having the information identifying the first account but not the person.

12. (Original) The method according to claim 10 wherein said step of determining the first credit limit determines the first credit limit to be zero prior to said step of receiving the personal information.

13. (Currently Amended) The method according to claim 12 further comprising the steps of

validating that the ~~unnamed anonymous~~, deposit and purchase transactions ~~where~~were caused by the person associated with the first account, wherein said step of determining the first credit limit is further responsive to said step of validating.

14. (Currently Amended) The method according to claim 13 wherein said step of validating further comprises the steps of:

determining an ~~unnamed source~~anonymous profile for the deposit and purchase transactions occurring prior to said step receiving personal information;

determining a ~~non-anonymous~~ named source profile for the deposit and purchase transactions occurring subsequent to said step receiving personal information; and

~~determination~~determining a degree of similarity between the unnamed source of the deposit ~~anonymous~~, and ~~non-anonymous~~ named source profiles.

15. (Currently Amended) The method according to claim 13 wherein said step of validating further comprises the steps of:

determining an anonymous biological identification of an ~~unnamed anonymous~~, person causing deposit and purchase transactions occurring prior to said step receiving personal information;

determining a named source for a ~~non-anonymous~~ biological identification of a ~~non-anonymous~~ named person causing deposit and purchase transactions occurring subsequent to said step receiving personal information; and

~~determination~~determining a degree of similarity between the ~~anonymous~~
unnamed and named~~non-anonymous~~ biological identifications.

16. (Currently Amended) The method according to claim 1 wherein at least a portion of the loan granting and repayment are ~~anonymous~~from an unnamed source, without identification of a person associated with the first account, and the method further comprises the step of

receiving personal information identifying a person associated with the first account wherein

said step of generating credit information includes ~~anonymous~~from an unnamed source of a loan and loan repayment information occurring prior to said step receiving personal information.

Claims 17-54 (previously cancelled)

55. (New) The method according to claim 1 wherein the first account is a prepaid card account.

56. (New) An automated method of authorizing a consumer purchase comprising the steps of:

receiving a plurality of deposit transactions depositing funds within a first card account, wherein the first deposit transaction is an anonymous deposit without any personal identifying information of a first account holder;

determining a first credit limit associated with a loan amount for the first card account wherein the first credit limit is based upon transaction information including the plurality of deposits into the first account;

receiving a request for authorization of a purchase transaction associated with the first account holder; and

authorizing the purchase transaction if funds within the first account plus the first credit limit are sufficient to facilitate the purchase transaction.

57. (New) The method according to claim 56, further comprising:

determining a loan amount in response to an amount of the first credit limit utilized for said step of authorizing;

granting a loan in response to the loan amount;

receiving a subsequent deposit transaction having additional funds associated with the first account;

applying a loan repayment portion of the additional funds to at least partial repayment of the loan and transferring a remaining portion of the additional funds to the first account; and

updating the transaction information indicative of the loan granting and loan repayment to permit a new loan amount to be determined.
